

Chouchin Mini, suspension design Ionna Vautrin 2013

FOSCARINI

Chouchin is the name of oriental paper and bamboo lanterns, that have inspired a family of contemporary lamps, where the fine appeal of blown glass, the charm of colour, the magic of light and the possibility of creating different shaped compositions merge to create emotions that are both familiar and unprecedented at the same time. The "Mini" version enlarges the project Chouchin to offer further composition and placement possibilities. The diffuser is available in two shapes and in two complementary colours: orange and green. As in the larger version, the

lower rim remains white, to create a distinguishing graphic mark when the lamp is switched off and an incandescent luminous border when it is on. Chouchin Mini is designed for use alone, as a small and poetic suspended lantern, or in rows or groups, even teamed with the larger model, to light a table, a bar or a counter with a concentrated down-light. The small size underscores its personality as an accent light, clad with unadorned elegance which makes it all the more precious. It is also available in a version with Led light, which is especially suited to

contract settings thanks to its energy efficiency and long life characteristics.

Chouchin Mini, suspension technical info

FOSCARINI

Description

Suspension lamp with direct light. The hand-blown cased glass diffuser is plain liquid coated with a glossy finish. Painted metal and steel diffuser support, stainless steel suspension cable and transparent electrical cable. Ceiling flange with galvanized metal bracket and matt white batch-dyed ABS cover. Canopy decentralisation kit – multiple canopy available (up to 9 suspension lamps).

Chouchin Mini, suspension multiple composition

FOSCARINI

Description

A technical solution that couples function with design harmony: The multiple ceiling flange of Foscarini makes it possible to create compositions up to 9 suspension lamps to create cascades of light of high emotional impact, particularly suitable to enrich a stair case. The standard multiple flange is designed to suit a large number of suspensions from both Foscarini and Diesel with Foscarini collections.

Chouchin, suspension design Ionna Vautrin 2011

FOSCARINI

Chouchin is a family of suspended lamps that takes its name from traditional Japanese paper and bamboo lanterns used as light and bright signs outside restaurants and bars, or as lucky charms outside homes. Their typical shape have been reinterpreted in a pure contemporary style, using an age-old material: blown glass that has been painted to make it completely opaque and glossy. The result combines a warm colouring, textured and precious, with a luminous collar that projects an intense, direct beam of light downwards. The family includes three shapes,

each with its colour: orange for the large version, grey for the small version and green for the elongated one. The shape and shade accentuate the individuality of each model, coloured in tones that combine beautifully with each other when used in multiple compositions.
